Course Description:

The Course in Advanced Trauma Nursing: A Conceptual Approach to Injury and Illness is an innovative continuing education program, which uses a case study approach and critical decision-making skills. This advanced course combines didactic content with interactive discussions, presented in a flexible format.

Course Objectives:

Upon completion of the course the participant should be able to:

- Analyze psychophysiologic concepts as they relate to human responses to injury
- Integrate the psychophysiologic concepts through case studies
- Synthesize the principles of trauma system development, ethical dilemmas, and the application of science to nursing practice with the physiologic concepts to assure a comprehensive approach to the injured patient
- Evaluate the effectiveness of advanced trauma nursing on patient outcomes

Summary of Key Points:

- Scientific Foundations (now integrated in the case studies)
- Framework for Decision Making
- Complex Case Study Review
- Professional Practice Issues
- Ventilation and Gas Transport
- Transport and Perfusion
- Host Defense Systems
- Mobility and Sensation
- Pain
- Consciousness

Course Director: Gail Dodge, RN, MS, EMERGENCY NURSES ASSOCIATION

Course Coordinator: Janet O'Leary, RN, Trauma Program Manager

Space is limited to 24 participants

Notification of cancellation must be in writing within 10 business days in advance of program start date to receive a full refund. The ENA CATN manual must be returned in new condition. Less than 10 business days notice will result in 100% forfeiture of registration fee. Full refunds will be issued to all registrants if the course is canceled by SJRMC.
